

Kankoko Management System – Updated Privacy Policy

This version of the Privacy Policy now includes details regarding data migration processes and school-administered onboarding.

When onboarding, schools may choose to have iKhosler Solutions perform data entry (for a UGX 50,000 migration fee) or opt to perform the setup internally using administrative access. Any data provided during setup is processed securely in accordance with our privacy standards.

The system management and maintenance services billed per term include technical support, updates, and secure data storage for both small and large schools. No personal or student data is shared with third parties without consent.

These updates ensure compliance with regional data protection and education sector regulations across East and Sub-Saharan Africa.
